Question 1. (Single Select)

You need a tool on a SAN Fabric that Will deliver protocol diagnostic, fabric configuration validation With SPOCK, and assess the

health of physical ports with self-healing and fabric monitoring.

It must perform end-to-end diagnostics while using predefined templates to reduce configuration errors.

Which diagnostic tool should be used?

- A: HPE InfoSight
- B: Off-Line Diagnostics
- C: On-Line Diagnostics
- D: Network Orchestrator

Correct Answer: A

Explanation:

According to the HPE website, HPE InfoSight is a cloud-based AI platform that delivers global visibility and insights into the health, performance, and capacity of your HPE storage and servers. It can also provide protocol diagnostics, configuration validation with SPOCK, and assess the health of physical ports with self-healing and fabric monitoring¹. It can also perform end-to-end diagnostics while using predefined templates to reduce configuration errors¹

Question 2. (DRAGDROP)

Map the HPE platform and workload-oriented solutions with the customer's challenge.

Solution		Challenge
Containers solutions		Unify operations and management
Data Management and Analytics solutions		Provide stability to scale anywhere
Hybrid Cloud solutions		Improve user experience while managing costs
Transcoding & Visualization solutions		Accelerate time to value from insights
VDI solutions		Simplify acquisition and deployment of complex systems

Correct Answer:

Solution		Challenge
Containers solutions	Hybrid Cloud solutions	Unify operations and management
Data Management and Analytics solutions	Transcoding & Visualization solutions	Provide stability to scale anywhere
Hybrid Cloud solutions	VDI solutions	Improve user experience while managing costs
Transcoding & Visualization solutions	Data Management and Analytics solutions	Accelerate time to value from insights
VDI solutions	Containers solutions	Simplify acquisition and deployment of complex systems

Question 3. (Multi Select)

What value does deploying workloads on HPE GreenLake provide? (Select two.)

- A: Pay for resources consumed
- B: Foundation Care support
- C: Capacity on demand licensing model
- D: capacity ahead Of demand
- E: Single-pane management interface with OneView for storage and server management

Correct Answer: A, D

Explanation:

HPE GreenLake is a cloud services platform that delivers on-demand capacity and planning, combining the agility and economics of the public cloud with the security and performance of on-premises IT. Some of the benefits of HPE GreenLake include:

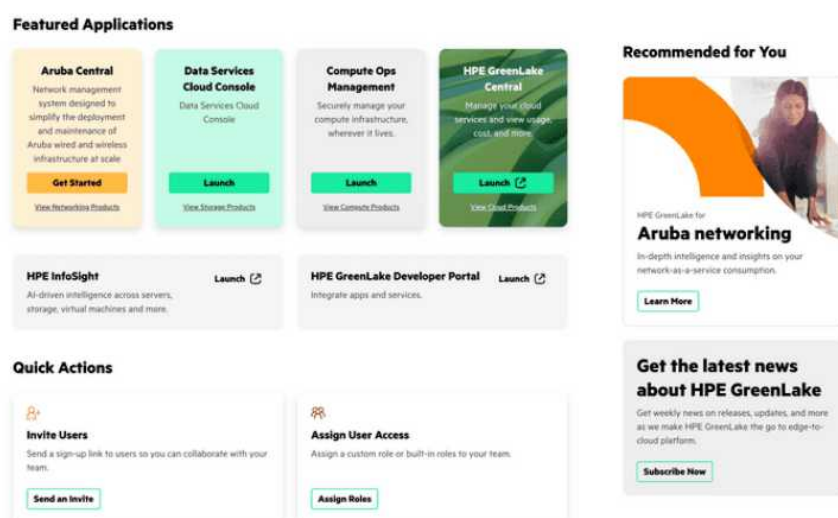

Pay for resources consumed: HPE GreenLake offers a pay-per-use model that aligns costs with actual usage, reducing overprovisioning and improving cash flow. Customers can also scale up or down as needed and only pay for what they use.

Capacity ahead of demand: HPE GreenLake provides customers with buffer capacity that is ready to use in minutes, not months, enabling them to respond quickly to changing business needs. Customers can also access a range of cloud services from HPE and partners through a self-service portal.

Question 4. (HOTSPOT)

You connect to the compute ops Management (COM) through the Green lake Cloud Platform dashboard. The server you want to manage is missing

Click where you can add the server so it appears in the CoM.

Correct Answer:
